

Examples of Psychopharmacologic Medication as of 2017

-- Medications to Be Monitored for Tardive Dyskinesia Are Bolded --

<u>ANTI-ANXIETY</u>		<u>ANTIDEPRESSANT</u>		<u>ANTIMANIA</u>	
<u>Generic</u>	<u>Trade</u>	<u>Generic</u>	<u>Trade</u>	<u>Generic</u>	<u>Trade</u>
alprazolam	Xanax	amitriptyline	Elavil	carbamazepine	Tegretol
bupirone	BuSpar	amoxapine	Asendin	lithium	Lithobid
chlorazepate diK	Tranxene	bupropion	Wellbutrin	oxcarbazepine	Trileptal
chlordiazepoxide	Librium	citalopram	Celexa	topiramate	Topamax
clonazepam	Klonopin	clomipramine	Anafranil	valproate	Depakote
diazepam	Valium	desipramine	Norpramin	<u>SEDATIVE/HYPNOTIC</u>	
halazepam	Paxipam	desvenlafaxine	Pristiq	chloral hydrate	Noctec
hydroxyzine	Vistaril	doxepin	Sinequan	estazolam	ProSom
lorazepam	Ativan	duloxetine	Cymbalta	eszopiclone	Lunesta
oxazepam	Serax	escitalopram	Lexapro	flurazepam	Dalmane
prazepam	Centrax	fluoxetine	Prozac	glutethimide	Doriden
<u>ANTIPSYCHOTIC</u>		fluvoxamine	Luvox	quazepam	Doral
aripiprazole*	Abilify	imipramine	Tofranil	temazepam	Restoril
asenapine*	Saphris	mirtazapine	Remeron	triazolam	Halcion
brexpiprazole*	Rexulti	nefazodone	Serzone	zaleplon	Sonata
chlorpromazine	Thorazine	nortriptyline	Pamelor	zolpidem	Ambien
clozapine*	Clozaril	paroxetine	Paxil	<u>MISCELLANEOUS</u>	
dariprazine*	Vraylar	phenelzine	Nardil	amitriptyline/	Triavil/
fluphenazine	Prolixin	protriptyline	Vivactil	perphenazine	Etrafon
haloperidol	Haldol	reboxetine	Vestra	carbamazepine	Tegretol
iloperidone*	Fanapt	selegiline	Emsam	clonidine	Catapres
loxapine	Loxitane	sertraline	Zoloft	clonidine	Kapray
lurasidone*	Latuda	tranylcypromine	Parnate	gabapentin	Neurontin
molindone	Moban	trazodone	Desyrel	guanfacine	Tenex
olanzapine*	Zyprexa	venlafaxine	Effexor	guanfacine	Intuniv
paliperidone*	Invega	desvenlafaxine	Pristiq	lamotrigine	Lamictal
perphenazine	Trilafon	<u>STIMULANT</u>		naltrexone	Trexan
prochlorperazine	Compazine	amphet-d' amphet	Adderall	propranolol	Inderal
pimozide	Orap	atomoxetine	Strattera	<u>NON-PSYCHOTROPIC</u>	
quetiapine*	Seroquel	d'amphetamine	Dexedrine	metoclopramide	Reglan
risperidone*	Risperdal	dexmethylphenidate	Focalin	prochlorperazine	Compazine
thioridazine	Mellaril	lisdexamphetamine	Vyvanse	promethazine	Phenergan
thiothixene	Navane	methylphenidate	Ritalin/ Concerta/ Metadate/ Daytrona		
trifluoperazine	Stelazine		Cylert		
ziprasidone*	Geodon	Pemoline			

*Newer atypical antipsychotic medication may be associated with less TD than traditional antipsychotic medication.

IMPORTANT: This list is not necessarily complete. New medications may be introduced, other older medications may still be available, and other trade names may exist. If new antipsychotic medications are marketed or if older antipsychotic medications or phenothiazines not on the list are prescribed, also monitor these for tardive dyskinesia.
